Project Description :

Amongst the rising covid-19 cases , it becomes extremely difficult for patients to arrange plasma and the medicines required to fight covid-19.

Covid-Relief System is an app which will provide users with a platform to donate plasma as well as request plasma during the time of emergency.

It also provides the functionality to order medicines directly from the pharmacy and get it delivered to them.

Moreover, It also helps a covid patient connect to contact NGO which would raise funds for their overall treatment cost.
